We Offer a Professional Product Line

The Rx Wellness Center program is a professional product line designed specifically for pharmacies. We did the research to determine the best pharmacy products and the best manufacturers and developed a line of products that covers most all of your wellness product needs. And all of our products are based on the latest research for ingredients, dosage forms, synergistic formulas and most importantly, are all of pharmaceutical grade.

Best of all, the product line is custom labeled for your pharmacy to give you an exclusive line on which to build your business. The products are also color-coded for an attractive shelf display and easier identification; and we backup the product line with supporting health and product information in product catalogs, wellness reference books, and the latest research monographs. And finally, the products are attractively priced to provide good value to your patients..
